# FAQ'S

- Traditional pull-type scrapers ditch at 200 cubic meters per hour, T-Rex ditches at 2000 cubic meters per hour! No follow up tillage required
- T-Rex can be operated with tractors ranging from 200-625 horsepower
- Throws excavated material evenly over 300 ft depending on depth of cut
- Average 6" cut can be made anywhere from 3-5 mph depending on soil conditions
- Twice as large as most traditional rotary ditchers, leaving a ditch bottom twice as wide
- Can be used as a finishing tool to "step" or "flare" ditches
- Very few wear areas, can be used in rocky soil
- Range of cut can vary as deep as 2 ft
- Features easy hook up and operation – If you can drive, you can ditch
- Pricing is similar to rotary ditchers half its size
- Does not plug
